The Honorable Dan Burton, Chairman
House Government Reform and Oversight Committee
c/o Milt Copulos/Beth Clay
Room 2157 RHOB
Washington, DC 20515

Dear Representative Burton:

Forty years ago I was a sick man. I live in Los Angeles. If someone sneezed in San Diego, I got the flu. I had frequent colds, ear infections, cold sores, herpes, around my nose and mouth,

One day I had occasion to take my young son to the doctor. As we were getting ready to leave the doctor looked at me and said, "What in the world is the matter with you."

"I'm just getting over the flu again," I answered.

"What do you mean, again?" he asked.

"I get it about four times a year and it lasts a month,"

"You should be on therapeutic strength vitamins and take them for the rest of your life," he said.

I researched vitamins and their use. I took his advice. I have never had the flu or herpes again. Over all these years I have had possibly a half dozen mild head colds that cleared up in several days. I and my family have been free from flu, colds and infections.

Twenty years ago, lying in the hospital at the University of California Medical Center, recovering from injuries that shattered my pelvis, broke my legs and feet and eight vertebra, the attending doctor said to his assistant, "He heals faster than other people."

Now the drug companies working through the FDA and Codex are trying to take away my vitamins. They would make vitamins of any significant strength available only by prescription. Vitamins will be essentially unavailable.

People have died from prescription drugs. No one has died from vitamins. Nothing is safer than vitamins. Their only side affect is better health. There are hundreds of stories out there similar to mine.

Please Congressman Burton, don't let this happen. I hope you will answer my letter.

Congressman Burton, if you and your staff do not use vitamins, I hope you will learn all you can about them and start. This and not smoking is the greatest health insurance in the world.

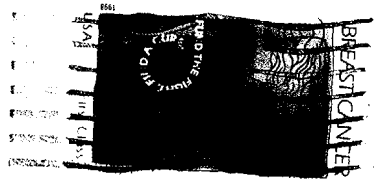

Hoping to hear from you, James Weakley

James Weakley
